---

This error was encountered when trying to upload new photos to the images/stories/ directory using the Media Manager.

Error was caused by the Settings of the **WYSIWYG Pro 3 Editor** plugin.

1. Navigate to **Extensions > Plugin Manager > WYSIWYG Pro 3 Editor**
2. Expand **Advanced Properties** on the right hand side
3. Enter new values for the multiple disk quota fields in there
4. **Save** changes
